

Apoxest QRP File Viewer Version 1.0

Apoxest QRP File Viewer is a utility software program distributed with Apoxest database programs. The viewer was created for users of Apoxest software, software developers who wish to add QRP functionality to their own programs, and those who need simple access to the QRP file type. The QRP file type is produced by one of the database report designers used by software developers.

Features

- Opens any file and attempts to run the appropriate program for viewing
- View or Print any QRP file type
- Search QRP documents for key phrases, search results indexed, quick access to any page
- Auto-run enables viewing and printing without the opening screen.
- Command line access for viewing any file type or printing QRP file types
- Sponsored Registration possible for clients of Apoxest software users (the Apoxest user you are being sponsored by will provide information necessary to complete the registration process)

Anyone may redistribute the unaltered copy of the Apoxest QRP File Viewer installation files. User's clients can receive a Sponsored registration for the QRP Viewer from an Apoxest software user. Apoxest users may sponsor up to 5 copies of the Apoxest QRP File Viewer. Sponsorship registration instructions are provided with each purchase of Apoxest software.

Apoxest is doing it's part to help protect the environment. We encourage users to send reports electronically as opposed to printing reams of paper, besides, it's cheaper and there's fewer paper cuts involved.

We use a lot of paper in the course of our jobs. The printing, handling, and sending "paperwork" to others takes time, and money. And, if damaged or lost, you have to redo it all over again!
